Our Services

# Who we are

Eclipse has been successfully providing regulatory and compliance services to the oil and gas sector since 2003. Our team of experts has in-depth knowledge of regulatory and compliance with respect to oil and gas infrastructure design, construction and operations in the Canadian marketplace and around the globe.

Our team will ensure your project is compliant no matter where your project is, or what regulatory body has jurisdiction.

Additional bodies Eclipse works with include:

- Alberta Boiler Safety Association (ABSA)
- Alberta Utilities Commission (AUC)
- BC Ministry of Environment
- Department of Fisheries & Oceans (DFO)
- Indian and Northern Affairs
- Transport Canada
- NAV Canada
- Environment Canada

## Our approach

**Nothing is more important to us than your compliance, because that is all we do! We incorporate a rigorous, systematic and comprehensive process to ensure compliance for your projects.**

To Eclipse, the most important aspect of your project is compliance. Our only focus is to ensure your project is compliant.

We are not a consultant that offers regulatory services as an add on. Our only business is regulatory and compliance services. Just as you utilize land, survey, and environmental experts for your projects, so should you use regulatory and compliance experts.

Our approach is simple, yet extremely effective. To be compliant with the appropriate acts and regulations, and ensure you have the correct permits and licences, you must have complete understanding of all applicable regulations.

Eclipse has the expertise and in-depth understanding of all oil & gas regulatory requirements. Our team of experts, along with our standardized templates, can quickly and accurately identify the applicable acts and regulations that must be adhered to for your project.

We then create a list of deliverables that must be completed and assign responsibility for each. Once all data has been completed and gathered from responsible parties we complete a compliance review and provide a final report.

**Compliance achieved.**

# What we do

Our expert knowledge and understanding of oil and gas regulatory and compliance helps you avoid the risk of enforcement action by regulatory bodies. Eclipse saves your company time and money by avoiding costly shut-in and stop work orders for both new and existing infrastructure.

We have a 100% success rate, that keeps our clients coming back. We have over 10 years industry experience and offer you an advantage by helping your company avoid significant delays in your projects schedule by expertly managing regulatory submissions and compliance on your behalf.

## Expertise

Experienced, Effective & 100% Guaranteed

With the new AER Enforcement Framework it is critical now more than ever that your company maintains compliance. Eclipse has industry leading compliance expertise in all oil and gas project types:

- 🔗 Well Drilling and Completions
- 🔗 Well Operations
- 🔗 Well Abandonment, Discontinuation and Reclamation
- 🔗 Pipeline Design and Construction
- 🔗 Pipeline Operations
- 🔗 Pipeline Abandonment, Discontinuation and Reclamation
- 🔗 Facility Design and Construction
- 🔗 Facility Operations
- 🔗 Facility Abandonment, Discontinuation and Reclamation
- 🔗 Production Reporting

# Our Services

Regulatory and Compliance consists of more than just submitting applications and obtaining approvals. In fact, Permitting and Licencing makes up only a small portion of regulatory and compliance for the upstream oil and gas industry. Regulatory Services and Compliance Services are distinctly different, and Eclipse is an expert in both.

## Regulatory Services

Regulatory is defined as “obtaining the necessary permits and licenses for construction and operation of a well, pipeline or facility”. Examples of these Regulatory Services include:

- 🔗 AER D056 Applications (Wells, Pipelines & Facilities)
- 🔗 AER D056 Audits & Reviews
- 🔗 AER D051 + D065 Applications
- 🔗 AER D042 Applications
- 🔗 AER D078 Applications
- 🔗 Transport & NAV Canada
- 🔗 AUC Rule 007 Applications and Registrations
- 🔗 Development Permits
- 🔗 Building Permits
- 🔗 ABSA Application & Approvals
- 🔗 OGC Permit Applications & Approvals
- 🔗 SIR Applications & Approvals

# Compliance Services

Compliance is defined as “being in accordance with all the applicable guidelines, directives and legislations associated with oil and gas projects”. There are over 180 potentially applicable regulations in Alberta alone. Examples of these Compliance Services include:

- 🔗 Air Dispersion Modeling
- 🔗 Noise Impact Assessments
- 🔗 Pipeline Integrity Management Manuals
- 🔗 Pipeline Operations and Maintenance Manuals
- 🔗 Decision Tree Analysis
- 🔗 EPAP (Enhanced Production Audit Program)
- 🔗 QAPs (Quality assurance Plans)
- 🔗 Land Package Reviews
- 🔗 Drawing Package Reviews
- 🔗 Facility & Pipeline Site Inspections & Audits
- 🔗 Permitting & Licensing Review of Existing Infrastructure
- 🔗 Corporate Compliance Review & Plans
- 🔗 Project Compliance Reports
- 🔗 Monitoring & Reports
- 🔗 Emergency Response Planning
- 🔗 H<sub>2</sub>S & EPZ Calculations
- 🔗 Sour Gas Proliferation

Eclipse knows what regulatory bodies demand and how to deliver expected results.
